tertaining is over except for the wedding parties, but the country houses around the capital are making the most of these days. when invitations extended to city friends are to say the least received with rapturous welcome. A dinner or an old-fashioned supper party, which is preceded by an hour's drive through the country and followed by the same back to town, is a most charming experience to those whose necessities or desires still keep them at the capital. Mr. and Mrs. Blair Lee will entertain at a dinner tonight at the Lee home at Silver Spring. Mr. and Mrs. Townsend, while not entertaining formally, had their pleasant home on Woodley Lane as a delightful change lately from the heat of the city. The extensive alterations and additions they are putting upon their future home on Massachusetts avenue are well worth staying in town to watch. When completed the Townsends will have one of the finest residences south of New York. Major and Mrs. Goodloe, who have been at their country place north of this city about a month, are as hospitably inclined as ever, and rarely spend a Sunday with-out guests.

Judge and Mrs. Hillyer, by the way, who have added considerably to the comfortable residence they will in future occupy on Hillyer place, are going to relaize another oft-desired satisfaction this summer in livoft-desired satisfaction this summer in living on their own farm. A permit has been granted to Louis P. Hall, general manager of the Georgetown and Tenleytown railroad, for the placing of a switch on 32d street just south of the Chesapeake and Ohio canal, and to make such minor repairs as are necessary for the preservation of the grade of the street. The new switch will take the place of one that has been in use, but which, under the present condition of affairs, is unsatisfac-

tory.
Traffic on the Chesapeake and Ohio canal is going on as usual, and the indications are that this year the total tonnage will exceed that of last year. The canal was day before Trial Officer Pugh on charges. opened somewhat earlier this year than It was alleged that the former had fired usual, and since the commencement of op-erations boats have been steadily employ-ed in hauling coal down from the other ed in hauling coal down from the other end, while shipments from intermediate points are larger than ever. Last season about this time there was a comparative glut in the coal market, so far as Georgetown was concerned. There were many boats lying loaded at this end, and no means of disposing of their cargoes, owing to the fact that no ships were in the river to carry them to other markets. This year it is different.

To Solve the Philippine Problem. To the Editor of The Evening Star: I have a scheme for solving the Philipping

problem and settling the vexed negro ques tion at the same time. Let 500,000 vigorous Afro-Americans be sent out there to fight the Filipinos, under the agreement that when the islands shall have been subjugated, each honorably discharged negro soldier is to have a homestead there. By setting apart a certain portion of the islands for that purpose, there is no doubt that a suc-cessful negro colony could be established in that part of the world.
